

NOW PROVIDING PHYSICAL THERAPY CARE THROUGH TELEHEALTH!

COVID-19 WILL NOT STOP US FROM CARING FOR OUR PATIENTS!

WHAT YOU'LL NEED

- ✓ **Internet access**
- ✓ **A device with a camera that has access to email.**
(computer, phone, or tablet)
- ✓ **Space to exercise**

We now have 2 ways to help patients recover from injury:

- 1. IN PERSON:** We are still open and welcoming patients to receive the care they need in our clinic.
- 2. ONLINE THROUGH TELEHEALTH:** Our therapists can still complete a visit for patients that are unable to make it into the clinic. We will use both VIDEO and AUDIO so that we can have two way communication during these physical and/or occupational therapy visits.

TELEHEALTH TOP TIPS!

1. Dress appropriately for your telehealth visit. This typically includes comfortable and exercise appropriate clothing.
2. Please gather any equipment you may have for your exercises prior to signing into your visit.
3. Please be ready with any questions you may have for your therapist so that we can address any issues.
4. The front office will call you to schedule any follow-up telehealth visits.
